Subject: Improvements to FEC web reporting
Date: Monday, September 11, 2023 6:02:22 PM

"Improvements"? Nah, you guys need a real, professional, modern website. What you have is 1980's or early 1990's technology.

Your website is horribly cheap and primitive.

An Excel spreadsheet would be easier and more user-friendly.

Your reporting tool was so ridiculous that we opted to not even do online reporting. And we closed some idle accounts to avoid the cumbersome reporting.

Get some independents appointed to the commission, and maybe something will actually happen again. As is, the FEC is a dysfunctional obstacle and a burden.
